Sapa Pana Travel

100% Latin America

The name Sapa Pana Travel was chosen by us with care in 2003. The words 'Sapa' and 'Pana' are taken from 'Quechua', an indigenous language that is still spoken in parts of Peru, Ecuador, Bolivia, Chile, Colombia and Argentina. In Quechua perform these words: "Your Unique Journey".

This exclusive and adventurous journey takes you through a landscape of volcanoes, surrounded by the dense jungle. We drive on winding coastal roads, past picturesque bays and pass deserted beaches. Discover the past and present of the fascinating cities along the route, from the modernity of Panama City to the colonial gems of Antigua in Guatemala and Granada in Nicaragua. These cities were founded in the first half of the sixteenth century. With their technically colored stucco houses and cobbled streets, they still breathe the charm and atmosphere of the time. The visits to Mayan and Aztec cities further down the journey take us even further back in time. Quite a contrast, and very special. In short, in four weeks you will drive almost 7,000 kilometers through very diverse and breathtaking landscapes. The nights are planned in the most special places, with comfort and the best of Central American cuisine for you to enjoy. While you drive your own car you always have support from our experienced Dutch, German, English and Spanish speaking tour guide and team of technical experts. An unforgettable trip that you definitely don't want to miss!

Please contact our team for more information.

Can team members be replaced?

Yes, this is possible. If the vehicle owner (also during the tour) exchanged, then you need to make sure that the new team members were previously registered with us.

Which documents do I need?

You need a passport that is valid at least six months after returning yet, your national driving license and international driver's license, (travel) insurance documents. For the vehicles you need the valid insurance papers, the registration certificate and a Carnet de Passage. The Carnet de Passage can be requested through the ADAC in Munich. For questions about obtaining the documents we can help you.

How should I prepare my vehicle?

You must ensure that your car is in good condition. Our mechanic team is equipped with mechanical precision parts, the main tools and the necessary know-how to help you. The team can bring any spare parts due to the large range of vehicles though. Therefore, you must provide spare parts and type-specific tools for your vehicle yourself. If the vehicle cannot be repaired immediately, then we trail you to the next town, where we help. If you are more than a day behind schedule, the tour for this period is initially without you. In this case, you need to pay accommodation costs and additional costs incurred itself. Once you catch the tour group again, the journey continues as planned. However, in our previous trips we didn't have a team that had not reached its goal for the day. There is always a solution!

How long is my car gone?

It takes four weeks to ship vehicles to and from Central America. This means your car is gone four weeks before the trip and comes four weeks after you return to Germany / Netherlands.

Can I ride with a borrowed vehicle?

Generally, it is advisable to drive your own car. If not being driven by your own vehicle, a use permit (power of attorney) the owner is required. The power of attorney must be certified and translated into English, Spanish and Portuguese. Please note that the vehicle must be registered in your name private and not a company name.

How difficult are the driving conditions and road conditions?

The roads used by us are not difficult to navigate, they are all removed and fixed. It can happen that we have to change the route due to construction work and the road conditions are more difficult than expected. Also note that the traffic in South America can not be compared with the German or the traffic in the Netherlands. You should not expect everyone stops at a red light. But do not worry - if you go ahead and are well prepared, you will have a great trip with lots of fun!

Is there enough fuel along the way?

Yes, on this trip, there are gas stations almost everywhere. If this is not the case on certain parts, we will inform you about this in time so that you have the opportunity to take jerry cans with you during that day.

Do we have to drive in column?

No! Before every run the exact route is declared by Leading teams, as well as the departure times of the technical teams. All detailed route information can also be found in the logbook. You just have to make sure that you leave before the technical team, so they can help you in an emergency. During the day you have a lot of freedom, but also the possibility to merge with other teams in a small group. In the evening, all teams can share their experiences and adventures.
